## Week 2 lab:

### Detect data bias with Amazon Sagemaker Clarify

- [Setup the lab](#)
- [Lab content: Analyze the dataset, Detect bias with Sagemaker Clarify, Analyze bias report.](#)
- [Finish the lab](#)

#### Setup the lab

**Note:** The lab uses Amazon Web Services (AWS) which take some time to spin up. You may need to wait a few minutes for the lab to open.

1. Click on ▶ Start Lab button to begin the lab.
2. Click on [AWS](#) link (top left), which will open AWS Management Console.

**Note:** If you see the window like in the following printscreen, click on **logout** link, close the window and click on [AWS](#) link again.

**Amazon Web Services Sign In**

Total score 100/100

Configure a DataConfig for unbalanced dataset	15/15
Processing job run for unbalanced dataset	15/15
Completion of processing job	15/15
Configure a DataConfig for balanced dataset	15/15
Processing job run for balanced dataset	15/15
Generation of bias report (JSON)	15/15
Correctness of the notebook syntax	10/10
